

# Green Family Ambassador Program

Interested in learning more about the environment?  
Want to help your very own village decrease its ecological footprint?

Sign your family up to be a **Nature Village Ambassador Family**, where children and adults alike can participate in fun activities, help lead events, and contribute to a strengthened sense of community!

## SUSTAINABLE LIVING

### What will I do?

#### *Projects!*

Work in teams to develop and execute engaging, creative projects for the whole family in whichever area of sustainability most interests you.

#### *Outreach!*

With a Volunteer Training Guide (pending completion) in hand, your family will gain expertise in the relationship between the Village and the environment. And what's more, you will be able to share your newfound knowledge with everyone else! If interested, specific positions will be available for a Communications Team and a Technical Team.

#### *Events!*

Help plan and/or participate in at least one event per semester such as Green Family Movie Night, Swaps, and Green Family Social Potlucks.
